MAPs/NWEA Data Trackers

- Separate sheet for each test
- Goal setting, graphing, annual point growth and end of year reflection
- Flexible format. Customize for your grade
- 3 formats: 3 tests, 4 tests and template
- Teacher class tracking sheet
- Teacher-tested tips to encourage best effort and grade level customization
MAPs/NWEA Data Tracker

Separate student sheet for Reading, Math, Language Usage and Science allows students to focus on one test at a time.

Graphing options:
- Fall, winter, spring sessions
- Fall, winter, spring and summer sessions
- Generic template without score numbers for customization

Goal setting

Goal planning

Annual point growth and end of year reflection
Data Tracker

Class MAPs/NWEA Data Tracker

Teacher-tested implementation tips

Class tracking sheet for accountability and reference

2 versions:
Three test sessions
Four test sessions
Welcome to MAPs/NWEA Data Trackers. I certainly appreciate positive feedback. If you have questions or comments, those are best addressed in the Q and A section. Thanks in advance.

Print out the testing sheets you will use. Look at the NWEA normative data and mark on the bar graph your grade level’s mean for Beginning, Middle and End of Year. Some teachers mark that number at the top of the chart column as well. Marking your grade level mean on the bar chart will help a student see what they should aim to achieve. Copy a paper for each student and write names. Either keep loose or punch holes and keep in a data binder.

Support students as they independently set RIT score goals in the correct spot. Discuss their goals and how they plan to achieve them. Note: Record their goal on your paper too. This will deter a student from changing the goal on their paper.

Students take test and record their score. Some may need support creating the bar chart. Revisit their gal for each consecutive test. The kids LOVE to see their bar chart column rise! Frankly, however, sometimes the bar chart does not rise and a student doesn’t meet the grade level mean. In this case focus on the positive – perceived effort, point growth since the last test, a new starting point – and discuss what could be done before the next test.

At the end of the year students should calculate annual point growth and reflect on their overall performance. This is eye opening for many students – and a positive spin for those not making the norm numbers.

Use these pages can be shared at conferences, added to portfolios, brought in to support the RTI process and in making SMART goals. Overall this process encourages students to take more ownership in their learning.

Thanks for purchasing my product,
**MAPs/NWEA Data Trackers**

Purchasing this lesson bundle entitles you to single classroom use.
Play by the rules you agreed to on Teachers Pay Teachers and do NOT share, publish or resell any part of this bundle. This includes teammates and administration. If others like what they see, please go back to the My Purchases tab and buy a multiple user license for the number of people who intend to use it.
In most cases, I’ve greatly reduced the Additional User License Fee.
Thanks for being honest.
